-20F-110F(-7C-73C)

10w non detergent compressor oil

30w non detergent compressor oil

40w synthetic non detergent compressor oil

Circuit Breaker

The positive wire that connects the battery to the Product is carrying the full amperage of the battery and could cause serious damage if it were to short against the metal of your vehicle. One way to protect against this wire shorting is installing a circuit breaker. Product recommends a 150 amp circuit breaker

This is a device mounted right next to your battery that will trip in the event that you have a wire that shorts out.
