

# STEEL COWL HOOD SCOOPS

## OUR HOOD SCOOPS ARE MADE FOR TRUCKS

and fit precisely over the original hood for most chevy, Ford's and Dodges. The HHR below took the Chevy hood scoop that fit the closest and worked the metal to make a real nice fit. We cannot assure you of how much work it would take for your vehicle, but if you are ordering for a truck model where we already make a fullsize hood, then it will set exactly on your factory hood.

Mark your hood where the scoop fits to, and grind the metal on the scoop underside and your hood, then tack weld with a spot welder at least every inch, then grind any high spots and fill with body filler and finish off.
